

How accessible is the school?

The school has recently undergone building work to improve the accessibility for all children, including disabled children. We have an open plan Key stage one classroom, disabled toileting facilities, a change bed and a standing frame. Staff have been fully trained in using this equipment safely. We have had outdoor building work carried out including; ramps to the main playground, front door access has been improved, and a more accessible foundation stage classroom has been created through removing wall to create an open plan classroom. The learning environment for disabled children has been greatly improved through having these works completed and the facilities and services now available are suited to the needs of our children.
